**PART II - SCOPE OF WORK**  
**Quote No. 25-009**

***Purchase of Runway De-Icing / Anti-Icing Fluid***

**Project Description:**

The Roanoke Regional Airport Commission is looking to purchase approximately 10,000 gallons of potassium acetate-based Runway De-Icing/Anti-Icing fluid on an “as needed and requested” basis. Bid quotes shall include all transportation, delivery, handling and any other associated costs of providing the fluid.

- The runway de-icing/anti-icing fluid shall be a Potassium Acetate based solution which meets all requirements of the FAA approved specification SAE AMS 1435.
- The solution shall be a minimum of fifty percent (50%) potassium acetate by weight plus corrosion inhibitors.
- The solution shall have a pH between 9.0 and 11.5.
- The solution shall have a freezing point less than -50°F
- Shipments shall be by tank truck to 5075 Peters Creek Road, Roanoke, VA, 24019

Each bidder shall include on the bid form the name of at least three Airport references for the same product being bid. Since the Commission does not desire to purchase a prototype product, the product being bid must have been in use for at least one full winter season at each of the named airports.

Each bidder shall submit with its bid, at no cost to the Commission, a certification by an independent third-party laboratory that its product meets all requirements of the FAA approved specification SAE AMS 1435 and any additional specifications contained herein. Each bidder shall submit, with its bid, a material safety data sheet for the Runway De-Icing/Anti-Icing product it proposes to provide.

Shipments must be delivered to the Roanoke-Blacksburg Regional Airport **within forty-eight (48) hours** of each request for shipment.

**Training:** The contractor will provide annual “ON-SITE” training. Training will include but not limited to:

- The purpose of the chemical;
- The application rates and temperature (pavement and ambient) of the chemical for best results

This training will be at no additional cost to the airport. Training will be required between October 1<sup>st</sup> and November 30<sup>th</sup> of each year.

**Testing:** The contractor will provide all means necessary to perform 3<sup>rd</sup> party testing of the potassium acetate. The contractor will also provide at no cost the testing and any additives which may be needed if the product does not meet the specification set within

this contract to the airport. Testing will take place between October 1<sup>st</sup> and November 30<sup>th</sup> of each year.

The Roanoke Regional Airport Commission currently has sufficient storage for 10,500 gallons of potassium acetate based liquid deicing fluid. The actual usage is totally dependent upon weather conditions. These estimates are provided for the benefit of the potential bidders and shall in no way be construed to require the Commission to purchase any minimum amount of de-icing/anti-icing fluid, nor constrain it from purchasing more. However, unless the contract is cancelled or otherwise terminated or an emergency condition develops, the Commission shall be required to purchase all of its requirements for Potassium Acetate Base Liquid De-Icer/Anti-Icer during the contract term from the successful bidder.

The Roanoke Regional Airport Commission will initiate an order for approximately 10,000 gallons of Runway Deicing /Anti-icing Fluid when it is determined that the Commission's storage capacity can accept that amount. However, it is understood that the type of truck, loading condition or other factors may cause the quantity delivered to vary. The Commission will pay for the gallons actually delivered at the rate per gallon quoted on the successful bidder's bid form (Part III – Bid Form). If a delivery truck is carrying a quantity in excess of 10,000 gallons, the Commission may be able to accept the additional fluid; however, it is not obligated to do so, or to pay for any undeliverable excess fluid.
